

# Life consists of spaces.

How we define them, use them, live in them matters.

**Live in your element. Live without apology.**

## iElements combines a love of design with an intimate and extensive knowledge of the real estate market.

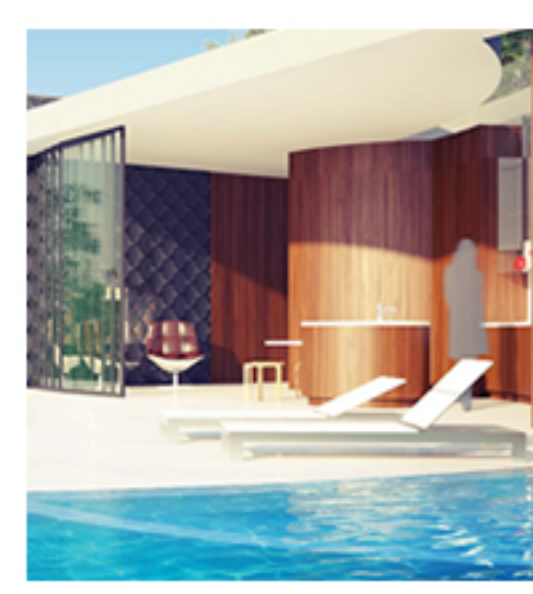

Whether the project is one room, an outside space or an entirely new build residential project, we work together with our clients to create a shared vision that is seamlessly executed.

## SUCCESS BY iELEMENTS

### EXPERIENCE

Over two decades of real estate experience has provided the iElements team a balanced insight into what successful design demands. With experience the eye matures, themes are identified and comfortable luxury realized.

22+  
YEARS

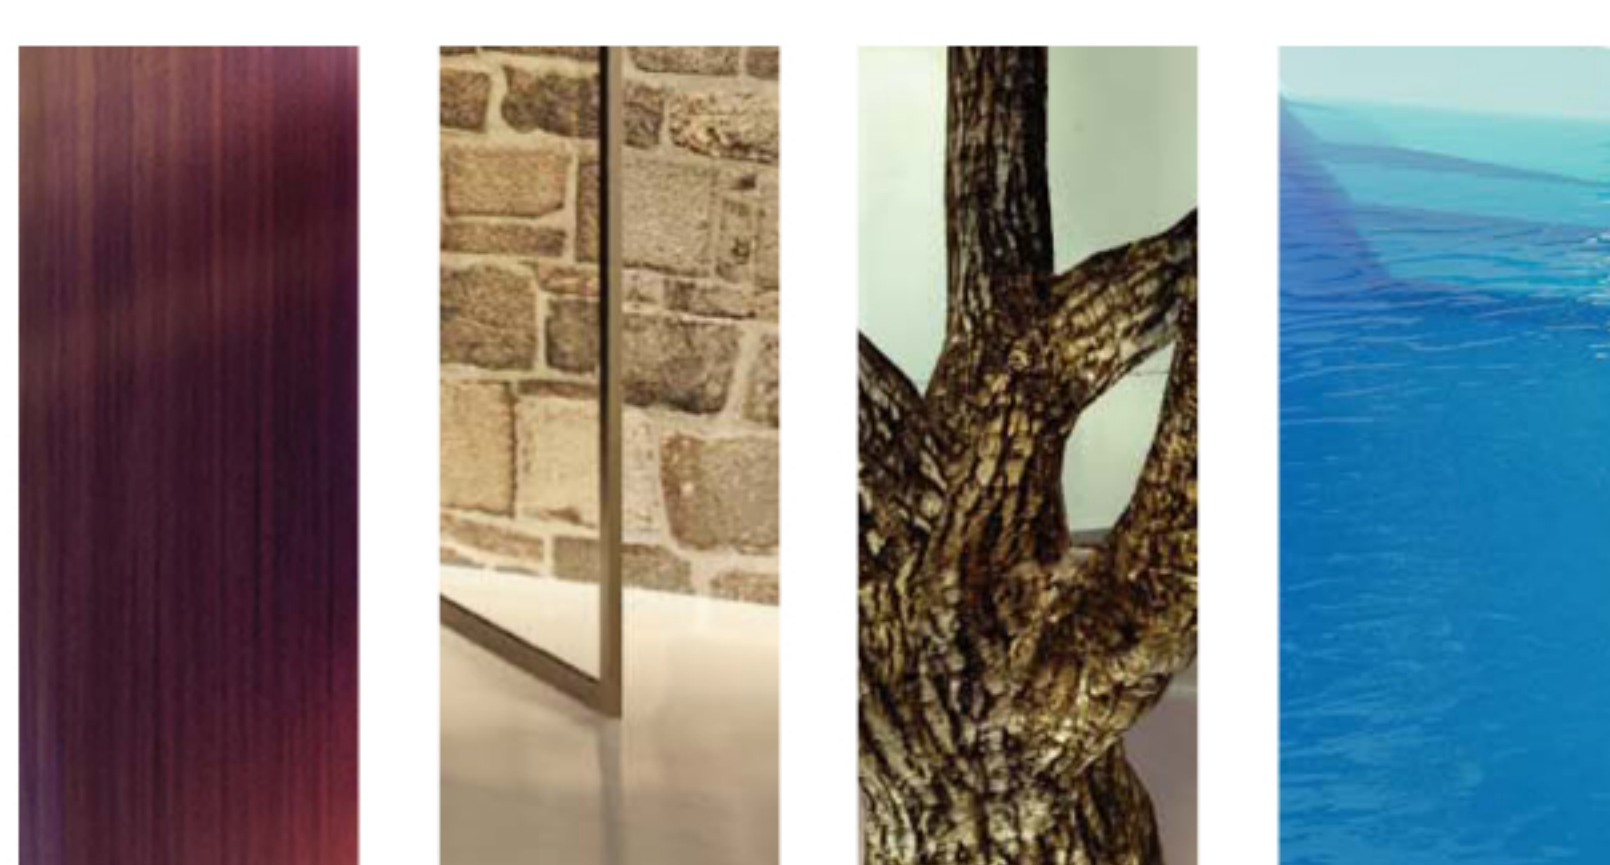

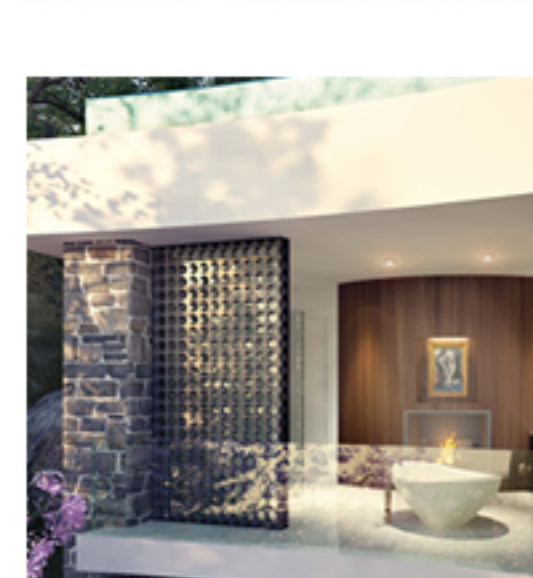

### SURPRISE

Great spaces don't just engage and envelop the user, they inspire and surprise as well. A successful design interacts across the spectrum, involving all the senses and comfortably catches visitors and owners off-guard to create new experiences.

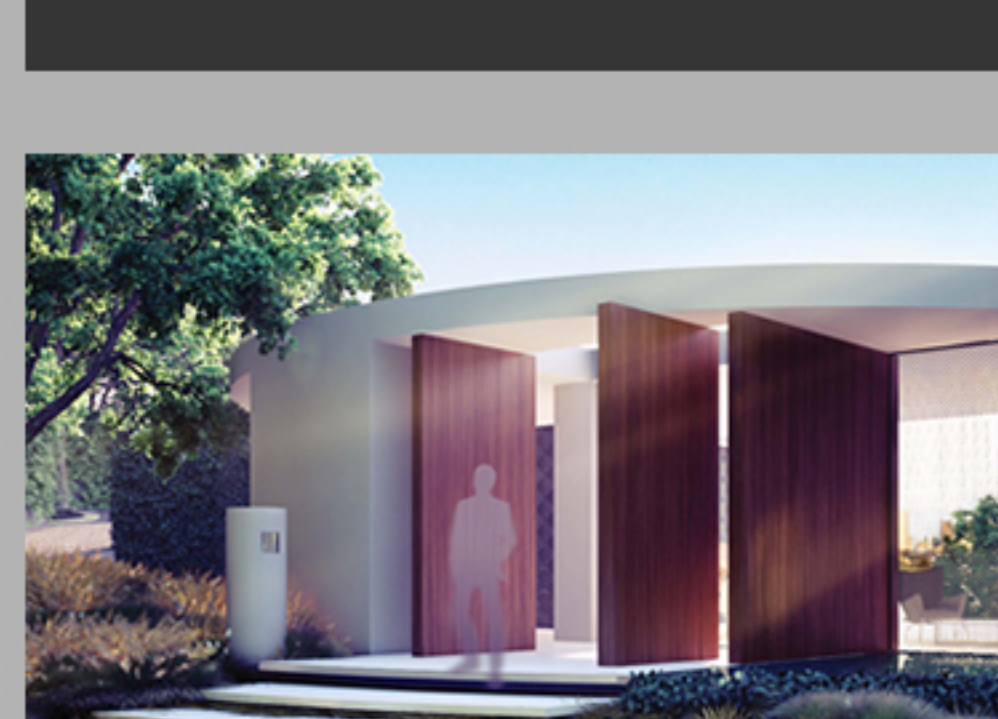

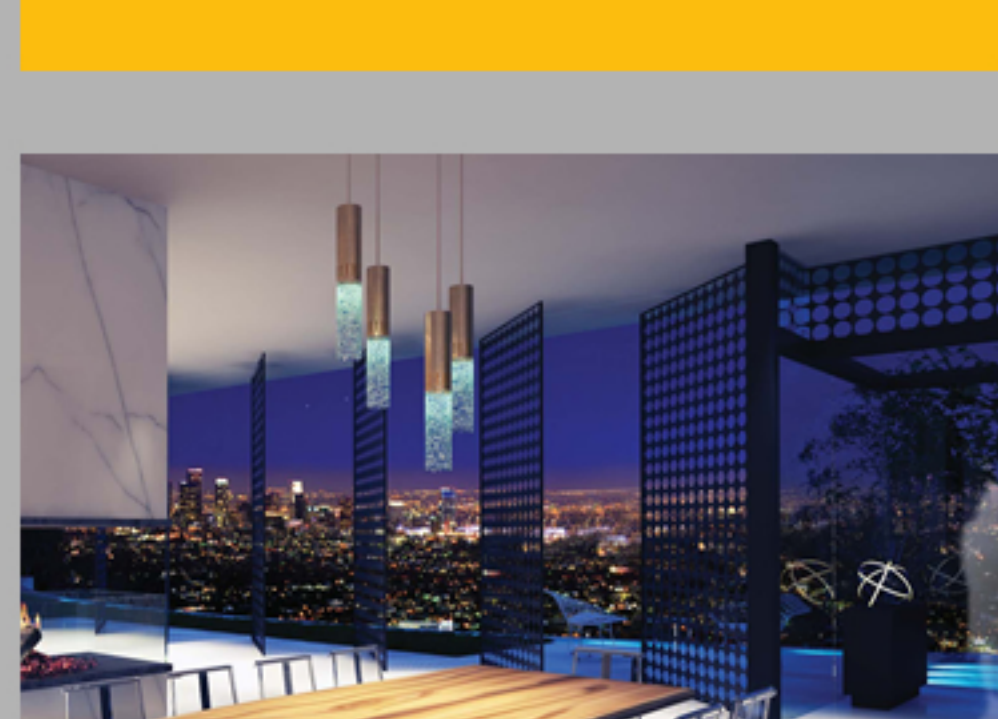

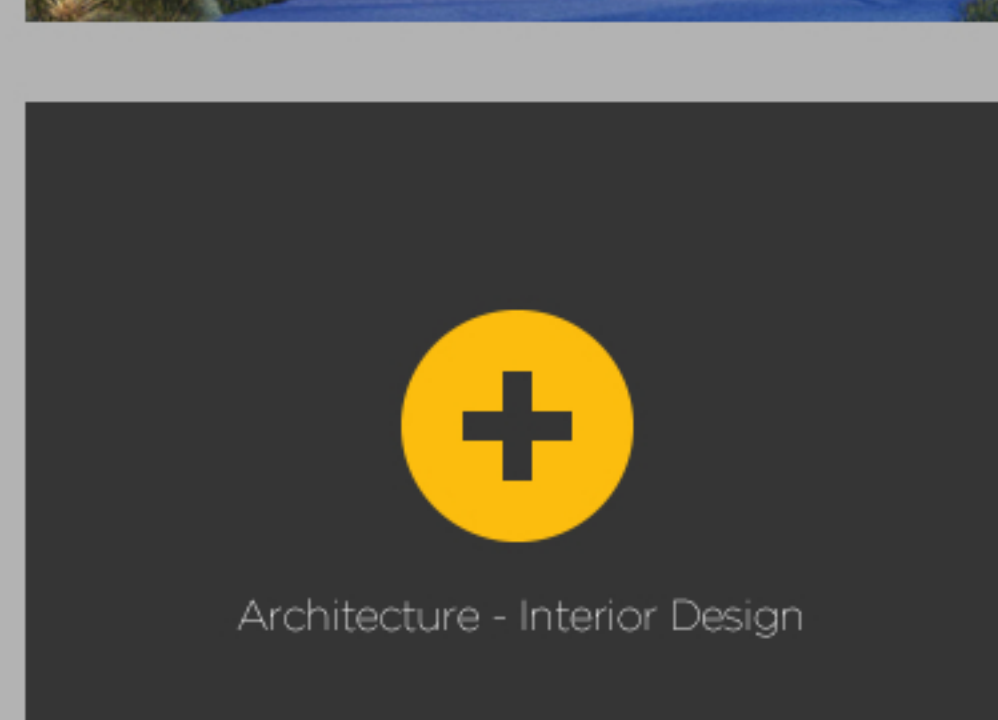

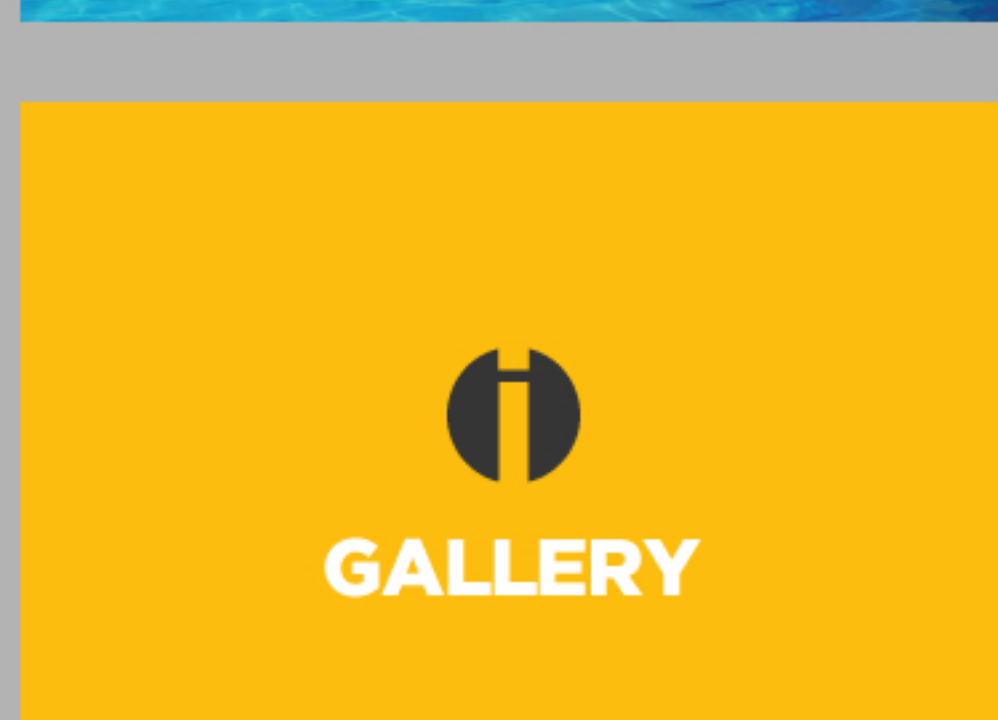

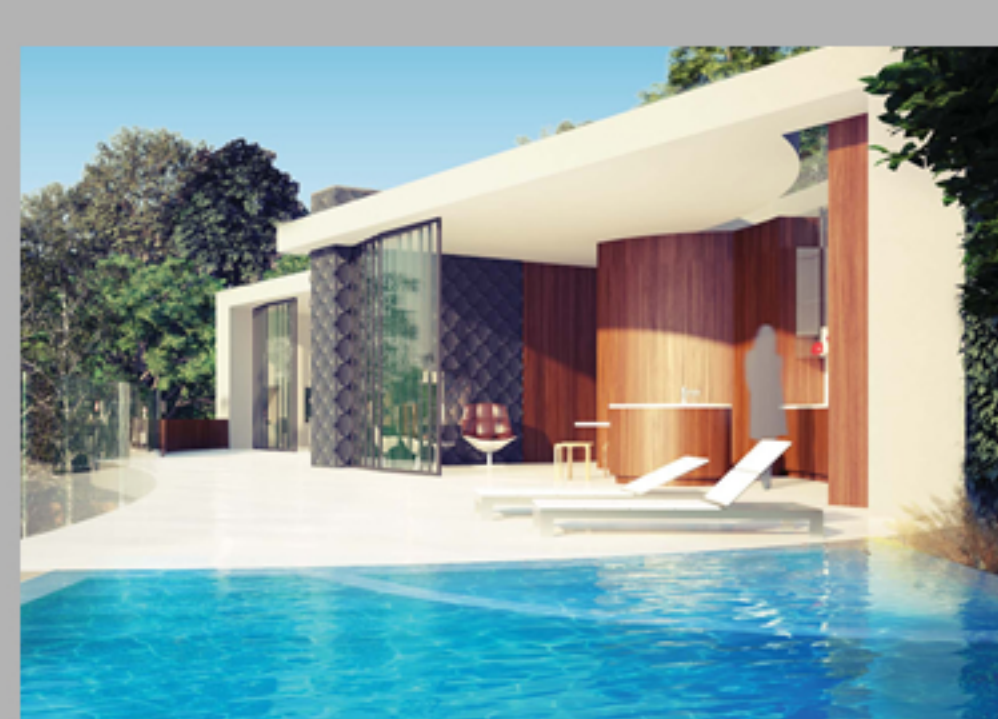

### BREATH

Great design must be lived in. By focusing pristine attention on creating breath within space, designs become livable and healing.

### TOUCH

Texture enriches and deepens an experience; great design embraces texture in all capacities.
